

GMHAN Task Group Sprint Schedule

The task groups will continue to work in ‘sprints’ but the sprint theme will be tied to the quarterly network events. This means that each sprint will run for approximately 3 months (1 Quarter) and focus on the same theme as the full network events.

Overarching network themes will be set out 6-9 months in advance, but there will be flexibility within. The task groups will work on the theme in advance of the network event, for example by bringing in key partners to influence, identifying areas of focus and opportunities to improvement. The task groups will also continue working on the theme after the event, to capture learning and take any necessary follow-up actions.

The task groups will be supported with this by the coordination group. Members of the coordination group who have knowledge on the theme will attend all three groups for the first meeting of the sprint, to share what they know about the theme, current ongoing work, and already identified problems in this area.

2024 Timeline

Timeline	Focus
